# Summer Camps on The Bluff!

## Robotics and Sensors Summer Camp

### About the Program

Robotics and Sensors Academic Program was established in the Computer Science Department, Southern University, Baton Rouge, Louisiana Campus with the expectation of attracting students to content domains such as mechanics, electrical circuits, and applied mathematical reasoning that all too often are stumbling blocks for high school and middle school students.

Robotics engages students in complex, strategic problem-solving and higher-order thinking with a set of skills that is a high priority for 21st century education. What is more, this kind of problem-solving can be introduced in a gradual, self-motivated way, so middle and high school students can experience satisfying achievements right away and can quickly move on to new challenges in a continuous progression toward greater levels of sophistication.

The summer program will take place on the Southern University Campus in the department of Computer Science in T.T. Allain Hall. Dates for the program will take place beginning June 5 through June 30, 2017, a four week, Monday - Friday, 9:00 a.m. to 3:30 p.m., consisting of students from the Baton Rouge and surrounding areas.

**Session: Summer 2017**

## **Pathways to the C-Suite Internship Program**

**PROGRAM DATES: May 28, 2017 – Aug 4, 2017**

Building on the nearly thirty (30) years of success CBCF has in recruiting, identifying and placing some of the best and the brightest in the black community for these programs on Capitol Hill; and in response to a number of our donor and **supporters'** requests, we are expanding our internship program to include placements in the private sector. This will ensure our future leaders have an opportunity to experience how public policy is influenced and developed at every level of the process.

Recognizing that public policy is ultimately shaped by a variety of stakeholder perspectives to include individuals, the private sector, and the media, the purpose of the CBCF private sector internship program is to leverage our ability to engage more undergraduate and post-graduate African-American students in opportunities to experience public policy development and stakeholder engagement and influence beyond Capitol Hill.

Housing and a stipend are provided. Applicants must have a minimum GPA of 2.5 on a 4.0 scale; should be at least 21 years of age at the time of application; have a permit to work in the U.S.; have a demonstrated interest in public service, public/media relations, and/or policy making; applicants must demonstrate strong writing ability. Recent graduates are eligible as long as they have not yet started post-graduate studies and have graduated no more than a year from the internship program start date.

#### **Overview**

The CBCF Emerging Leaders: US-China Study Delegation is a study abroad program designed to provide African-American students living or attending school in Congressional Black Caucus (CBC) member districts with the opportunity to experience Chinese culture and learn Mandarin during a two-week visit to China. Through this initiative, the Congressional Black Caucus Foundation, Incorporated (CBCF) aims to promote African Americans' interest in career and study options involving US-China relations, thereby expanding opportunities for African Americans in an era of increasing globalization.
