

Publishing Assessment Results to Students

Completing and submitting an assessment does not mean the assessment has been published to students

When creating a course assignment, the **Publish Assessments** checkbox is selected by default under the **Assessment Method** setting on the **Assignment Details** page. This setting allows a student to receive the assessment results instantly after an assessor completes and submits the assessment. You are able to uncheck the **Publish Assessments** setting on the **Assignment Details** page so that assessment results are not released to students until all students in the class are assessed (i.e., all are in the **Completed** green column). Once all students in the class are assessed, the **Publish Assessments** button on the **Submissions & Grades** tab is enabled to release all of the assessment results at once.

Publish Grades to Students Instantly (Default)

1. The **Publish Assessments** checkbox on the **Assignment Details** page is selected by default under the **Assessment Method** setting.
2. Once you finish assessing the student's work, click the **Submit Assessment** button to release the assessment results to the student.

Publish Grades to All Students at Once

1. To uncheck the **Publish Assessments** checkbox on the **Assignment Details** page, click on the "Show More" in the lower right corner of the "Assessment" area.
2. All students in the class must be assessed in order to release the assessment results (i.e., all are in the **Completed** green column).
3. Once all students in the class have been assessed, click the **Publish Assessments** button to release all assessment results at once to students.
