## I. Subject Codes

All Southern University courses that were identified as equivalent, transferable courses within the Louisiana Common Course Catalog (to be referred to as “LCCC” in the remainder of this document) had the Subject codes revised to make it clear that the course is part of the Common Catalog matrix and is transferable within the Louisiana system.

To make these common courses more obvious to students, advisors and faculty, the subject code was modified by adding an “S” as the first character (prepended). The remainder of the code was modified to coincide with the LCCC abbreviations.

For Example:

Course subjects not mapped to the LCCC	Courses subjects mapped to the LCCC
BIOL – Biology	SBIO – Biology – SUS
ENGL – English	SENL – English – SUS

This pattern was followed for all courses that were mapped to LCCC courses for transferability within the State. In general, courses at the advanced level, 300 or higher, did not have the subject code changed as described above. However, if a 300 or higher level course had an LCCC equivalent, the course number was changed to align with the LCCC. Therefore you will see course number adjustments even at the 300 level or higher, but the subject code was not always revised as described above.

All other subjects that are not translated in the Louisiana Common Course Catalog have been converted using the previous subject code rubrics and had the numbers appended with the campus identifying character, as described in the next section.

During course conversion the course titles for each campus were retained.

These are the subjects that had course subjects and numbers re-aligned with the Louisiana Course Catalog:

Accounting
Arts - Fine Arts
Biology
Chemistry
Criminal Justice
Economics
English
History

Math
Physical Science
Political Science
Psychology
Sociology
Spanish
Speech-Theater-Communication

## II. Course numbering

The second significant identifier of a course in the catalog is the number. In the consolidated system all course numbers have been appended with a character that describes the campus/institution within the Southern University System\*.

The character identifiers are:

B – Baton Rouge

N – New Orleans

S – Shreveport

*\*The Law Center courses did not require this modification since there are no LAW courses in any other locations.*

In the case where a course number had previously contained an ending letter, such as for LAB, the L was retained and the campus identifier was added. In this example BIOL 105 has a new number to align with the LCCC, so the subject code and number has changed:

### Renumbering is based upon the course numbering system for the Louisiana Common Course Catalog

For example:

Common Course Number - LCCC	New Southern University Common numbers
CBIO 1011	SBIO 101B, SBIO 101S, SBIO 101N
CENL 2403	SENL 240B, SENL 240S, SENL 240N

## III. Searching for courses in “Look Up Courses” or in the Catalog from Self-Service.

After selecting a valid term for a class search in registration, only the courses that are valid for that term selection will return in the results. The user may search for the Southern University course subjects aligned with the LCCC and/or just those that have NOT been modified to denote the Southern University rubric. So, for example, if you are a Baton Rouge user and wish to search for Accounting courses, you will have the option to search for “SACC – Accounting - SU” or “ACCT – Accounting.” The user may also

## SUS CONSOLIDATED CATALOG COURSE SUBJECT CODE & NUMBER CHANGES

select both Accounting - SU and Accounting and will see all courses valid for that term that begin with both ACCT and SACC.

**Class Schedule Search**

Subject: Accounting -SU  
 Accounting -SU  
 Behavior Studies  
 Biology-SU  
 Chemistry-SU

## COURSE SUBJECT AND NUMBER CHANGES

Each subject area that had changes as a result of the alignment with the Common Course Catalog is listed with the courses that were changed. The courses are separated by the campus where the course is offered.

### ACCOUNTING
