CMPS 105
INTRODUCTION TO COMPUTER TECHNOLOGY

CATALOG DESCRIPTION: CMPS105 INTRODUCTION TO COMPUTER TECHNOLOGY
This course provides an introduction to computers and their uses in society. In addition, students will be
made aware of the use of applications of computers in the home, education and industry. An introduction to
application software and its uses in, but not limited to, word processing, spreadsheets, databases and
multimedia should be included. Prerequisites: None

Required Textbook: MICROSOFT OFFICE 365 Office 2016 Introductory, Shelly Cashman Series
Credit Hours: 3

Instructor: Shizhong Yang
Office Location: Henry Thurman Jr. Building, Room E105
Office Phone: 225-771-3113
Office Hours: Tur/Thr 2:00 pm ~ 5:00 pm
Email: shizhong_yang@subr.edu

Required Course Materials: You will need to bring to class each day your textbook and your backup storage
medium (USB drive). Your instructor will inform you how to store your laboratory assignments.

Course Objectives:
1. To introduce students to current computer technologies aimed at increasing computer literacy or
scientific knowledge through the computer models, computer science principles, strategies and practices
to issues relevant to students.
2. To motivate students to think of novel and precise solutions to real world problems and translate
conceptual ideas into practical solutions. Advanced topics working with word processing, spreadsheets,
database, and presentations as determined by instructor.
3. To provide students with tools and techniques for solving social, environmental, scientific and economic
problems faced in the living world. These tools and techniques should encourage students to take up
further research in areas of interest and emerging technologies and utilize these efforts for solving
complex problems.

Course Learning Outcomes:
1. Use microcomputer and business concepts of an integrated software package.
2. Demonstrate proficiency in the use of word processing, spreadsheet, database, and
multimedia applications for business applications.
3. Identify ways in which the microcomputer applications may be used to solve
problems in the business environment.
4. Apply an exercise-oriented approach to learn by example.
5. Comfortably approach further independent study.

Student Objectives:
Students learn to take a problem-oriented approach to questions addressed. The problem is viewed from
different perspectives and methods used to solve this kind of question are made explicit. Students creatively
frame their own questions and design strategies to address such questions. They are involved in analysis,
feasibility studies, problem solving, and knowledge generation processes that characterize the broad area of
study.
Course Topics: This course will cover the following topics.
1. Introduction to Basic Computer Software and Hardware
2. Introduction to Microsoft Office 2016
3. Microsoft Word
4. Microsoft PowerPoint
5. Microsoft Excel
6. Microsoft Access

Required Readings: As assigned by instructor.

Teaching Methodology: Discussion, lecture, required labs, visual aids, independent study, computer assisted instruction and other methods as determined by the instructor.

Other General Course Requirements: Class participation, tests/quizzes, examinations, hands-on computer instruction, projects, reports, library assignments, research papers, attendance, and other requirements as determined by the instructor.

General Information:

- **Student Conduct in Class Policy**
  
  Any acts of classroom disruption that go beyond the normal rights of students to question and discuss with instructors the educational process relative to subject content will not be tolerated, in accordance with the Academic Code of Conduct in the Student Handbook.

- **Plagiarism/Cheating**

  Plagiarism is defined as using and passing off as one’s own ideas, data, or writings of another or presenting as one’s own idea or product derived from an existing source.

  Cheating is defined as obtaining information through fraud or deceit: either by the use of unauthorized notes, books, or other sources prior to or during examinations, or by using information under false pretenses. It includes premeditated cheating, which is defined as conscious, pre-planned, deliberate cheating with materials prepared in advance.

  Students are expected to uphold the school’s standard of conduct relating to academic honesty. Students assume full responsibility for the content and integrity shall be that a student’s submitted work, examinations, reports, and projects must be that of the student’s own work. Students shall be guilty of violating the honor code if they:
  1. Represent the work of others as their own.
  2. Use or obtain unauthorized assistance in any academic work.
  3. Modify, without instructor approval, an examination, paper, record, or report for the purpose of obtaining additional credit.
  4. Give unauthorized assistance to other students.
  5. Misrepresent the content of submitted work.

  The penalty for violating the honor code is severe. Any student violating the honor code is subject to receive a failing grade for the course and will be reported to the Office of Student Affairs. If a student is
unclear about whether a particular situation may constitute an honor code violation, the student should meet with the instructor to discuss the situation.

For this class, it is permissible to assist classmates in general discussions of computing techniques. General advice and interaction are encouraged (except for exams and lab assignments). Each person, however, must develop his or her own solutions to the assigned projects, assignments, and tasks. In other words, students may not “work together” on graded assignments. Such collaboration constitutes cheating. A student may not use or copy (by any means) another’s work (or portions of it) and represent it as his/her own. If you need help, contact your instructor, not other classmates. Each student is required to bring their own textbook, USB drive, and course materials to class to do their work in class.

- Makeup Tests/Assignments:

  Students are expected to take or submit assignments/tests on the date specified on the syllabus or as per the instructor’s request. The instructor reserves the right to deduct points for every day an assignment is late or not to accept late work. There is no makeup for missed test unless under emergency or uncontrollable situation (e.g. severe sick).

Attendance:

  Although onsite access and synchronous online are not required for our online class, our university does track through MS Teams our student attendance. If you do have questions, we strongly suggest you ask them during our office hours through MS Teams.

Grading Distribution:

  A student’s grade at the end of the semester will be determined by the following percentages. **

  - 4 Exams (60%)
    All exams will be given in class only (face-to-face) and required a password for accessing the exam.
  - Laboratory Assignments (40%)

** Please use this Grading Distribution to calculate your Final grade, do not use Moodle Final grade because it may not be the same as Grading Distribution calculation.

Grading Scale:

  Course grades at the end of the semester will be given based upon performance using the standard grading scale.

  A 90 - 100
  B 80 - 89
  C 70 - 79
  D 60 - 69
  F 59 and below

Moodle Access:

  Southern University and A&M College at Baton Rouge will used Moodle extensively in this course. Moodle is a learning management system designed to help teachers and students communicate effectively online. The course syllabus, course calendar, assignments and exams will be placed on Moodle. Students should check Moodle DAILY for all assignments submitted via Moodle. If the students have problems with the Moodle account, he/she should contact Ms. Chrisena Williams-Brown in the Division of Information Technology via email at chrisena_williams@subr.edu or via phone at (225) 771-5017

- Disabilities Policy
In compliance with the Americans with Disabilities Act (ADA), all qualified students enrolled in this course are entitled to "reasonable accommodations." Student must notify the instructor at the beginning of the semester (first 2 weeks) of any accommodations needed for the course.

**Course Assessment:**
